PROFESSIONAL PROFILE

Software Engineering graduate with experience in IT support, system development, and data management. Strong in improving processes and supporting structured operations.

CORE SKILLS & TECH STACK

IT Support Documentation Inventory Management Team Collaboration Problem Solving HTML
CSS JavaScript React Node.js Full-Stack Development

PROFESSIONAL EXPERIENCE

Xtreme Cr8tivity

Aug 2025 - Present

IT Assistant

- Provided IT support and managed system maintenance.
- Improved organizational documentation processes.
- Managed inventory systems and collaborated across teams.
- Assisted in front-end web development tasks.

TECHNICAL PROJECTS

Unified Inventory & Enterprise Management System

Engineered a comprehensive internal platform to streamline stock management and organizational workflows.

- **Stock & Documentation:** Developed an automated documentation system to eliminate manual errors in inventory tracking and reporting.
- **Staff Data Management:** Built a robust Database Management System (DBMS) to centralize employee records, ensuring data integrity and secure access.
- **Customer Relationship Management (CRM):** Integrated a CRM module to optimize client interactions and maintain history.

Automated QR & vCard Generation Engine

Developed a specialized tool to solve the bottleneck of manual contact sharing and asset identification.

- **Batch Processing:** Built a logic-driven system capable of generating multiple unique QR codes and vCards simultaneously.
- **Scalable Integration:** Designed the architecture for seamless integration into digital ID cards or asset management protocols.

Staff Management System

Built a system for staff records and inventory tracking.

EDUCATION & CERTIFICATIONS

Federal University of Technology, Akure

2024

B.Sc Software Engineering

Certifications:

- NYSC Discharge Certificate
- Web Development Certificate - Complete Computers Center
